WORK EXPERIENCE

Php/ Laravel Developer   Present
XCL Technologies l hyderabad

Then, I resigned from the factory due to some personal issues. After that, I joined XCL Technologies as a Laravel developer. I joined on January 18th and the work here has been great. I've worked at three different places before, but now I am a senior Laravel developer here. I've worked on more than 4-5 projects, focusing on one application and currently having 2 pending applications that I'm working on.

Web Designer & Laravel Developer   Mar 2022 - Jan 2023
Data Foods Industry l hyderabad

Then, along with the mentors from NanoSoft Technologies, I also joined Factory Data Foods. I worked there for quite some time, almost a year. I had a good experience there as well, working on their software factory and developing 4 business-related websites for them. Additionally, I worked on their application, ensuring it was both quick and flawless. I was also involved in tasks related to APIs in that project. During this time, I managed both the factory job and NanoSoft simultaneously, dedicating my time to both jobs.

Web Designer & Laravel Developer   Apr 2022 - Sep2022
Nanosoft Technologies l hyderabad

Then I joined NanoSoft Technologies. There, I worked on frontend and Laravel projects. Over time, I gained valuable experience there. I worked on a total of 5 projects during my time there. I was able to accomplish a lot of quality work in a relatively short period. I worked on 1 application and 4 web applications.

Web Developer   Apr 2021 - Nov2022
Geekistans Software House l hyderabad

I spent a good time at Geekistan's software house where I had connected for an internship. There, I mainly worked on frontend and PHP projects. It was my first experience there after learning. After a couple of months of interning, they offered me a paid position. During the internship, I guided several other interns in frontend and basic PHP work, as there weren't many advanced features at that time. However, I left after a while, and the company eventually closed down.
